Quality products with professional support ...as standard

Hello,
 and welcome to the outstanding Bretford Powerful Sound Solutions range.

A PA system is inevitably required for most activities, including presentations, sports events, lectures, demonstrations, assemblies and fetes etc., but the simple fact is, one piece of kit is rarely able to serve every purpose!

A system that can support multiple applications could offer you, your school or office, huge benefits and exceptional value!

Bretford has been working with schools, colleges, universities and dealers for over 19 years and we have recently expanded our PA range to accommodate the ever changing demands from these markets, in order to offer maximum flexibility and versatility.

This extensive range now includes models that combine wireless PA with cassette recorders, anti-shock CD players, anti-shock DVD players, USB ports and even MP3 recorders, as well as features such as pitch control, voice priority, battery power and wireless connectivity. This provides endless opportunities for presenters and teachers to instantly expand presentations, enhance dance or fitness classes, utilise video and digital media whilst providing the flexibility to do so anywhere without the need to purchase additional equipment!

There are many important considerations when choosing PA systems and suppliers for schools, colleges, universities and offices where *best value purchasing, health and safety and security* are of **absolute priority**.

Durability is key in ensuring that you receive value for money. All our products feature robust construction, product guarantees of up to 2 years and are all backed by a company dedicated to customer service and support, providing complete peace of mind whilst giving you the confidence in knowing that you have made the *right choice* by choosing a Bretford product.

Environmental concerns are becoming of increased importance when making purchasing decisions. As a leading manufacturer, Bretford shares these concerns and we take our environmental responsibilities very seriously. Where possible, environmentally safe processes and recycled materials are used.

Our comprehensive sustainability policy is available to download from www.bretforduk.com/about-us

If you are unable to find what you are looking for in this brochure, then please do not hesitate in contacting us on **01753 53 99 55** to discuss the wide selection of alternative product ranges we have to offer, including Audio Visual, Technology, Furniture and Literature Solutions.

Regards

Colin Craythorne MD
