- **Storage & recharging of up to 30 netbooks**
- **Suitable for up to 10.2" netbooks**
- **Built-in Electronic Power Management system**
- **Energy Saving 'Auto-Power-Off'**
- **Fully tested and independently certified to BS EN 60 335-1: 2002 + A2: 2006**

Store & Charge

NETBOOK 30

Ease of use

Store and charge up to 30 netbooks from a single wall socket, suitable for up to 10.2" netbooks.

Power pack shelves and Y-leads are located in the rear of the unit to reduce the amount of excess cable and provide excellent cable management and easy front access to individual machines.

Utilises the netbook's own mains lead and connectors so can be used with multiple brands of netbooks at once

Green Credentials

The all-new energy saving 'Auto-Power-Off' feature automatically switches the unit OFF after a 50 hour charging cycle, allowing the unit to be left to charge over the weekend or night without overcharging the batteries or wasting energy.

Future Proof

Features a 12 year guarantee (1 year on electrics), plus all electronic components are housed in an easily removable module, which means that in the unlikely event that something goes wrong the user can quickly and easily replace just the power module, greatly reducing down time and prolonging the life of the unit.

Security

All steel construction and locking doors offers excellent theft prevention, while the individually locking rear door offers secure access to the; electrical sockets, power module, power pack shelves and cables, to prevent tampering..

Power Management

Features a built-in Electronic Power Management system (EPM) that regulates the amount of current being drawn from the mains supply, preventing the school's circuits being tripped and so minimising classroom disruption.

Certification

All Bretford charging trolleys are fully earthed and independently certified to BS EN 60 335-1: 2002 + A2: 2006, ensuring the highest levels of electrical/build safety and complying with the latest HSE Manufacturing Guidelines on electrical safety.

Rear door offers secure access to the electrical sockets, power module, power pack shelves and cables to prevent tampering

Y-leads are provided to reduce the amount of excess cable & offer excellent cable management

Ergonomically positioned handle to offer enhanced mobility

Code	Dimensions	Compartments
