

NETroller

Netbook Storage & Recharging

- Exceptional portability
- Storage & recharging of up to 16 x netbooks or 8 x Laptops
- Built-in intelligent charging system
- Stackable space saving design
- Supports Wifi
- Energy Saving 'Auto-Power-Off'

LAProller
Also available is the **LapRoller**TM to facilitate your *laptop* storage and recharging requirements

Designed in conjunction with Challenge CLC Bradford, the all **NEW NetRoller**TM range is an exceptionally portable storage and recharging facility for your school's netbooks.

The revolutionary design enables you to transport your equipment between classes, whilst the robust high impact ABS plastic construction, reduced size and dual handles means the **NetRoller**TM can also be easily carried up stairs or simply placed in a car for transporting between different locations.

NETroller

Exceptionally Portable

The light-weight shell and robust castors offer excellent mobility, enabling you to store, charge and transport up to 16 netbooks with ease. The **NetRoller™** is suitable for housing up to 16 x 10.2" netbooks and the **LapRoller™** is suitable for housing up to 8 x 14" laptops (models dependant).

Handles at both ends provide a safe two-person lift option and the reduced size means the **NetRoller™** can be easily carried up stairs or placed in a car for transporting between different locations.

Easy Access

Top opening lid is held open by a gas strut to allow for quick set up and easy access to equipment.

Space Saving

The unique compact design can stand upright or be stacked, ideal where space is limited (max 3 **NetRoller™** or **LapRoller™** can be stacked).

Power Management

All models feature a built-in Electronic Power Management system (EPM) that regulates the amount of current being drawn from the mains supply, preventing the school's circuits being tripped and so minimising classroom disruption.

The **NetRoller™** also features an intelligent charging system that manages the power to the netbooks and incorporates built-in connector leads, which reduce the amount of excess cables to offer excellent cable management.

Modules to support 240v/50hz, 9/11/12v operation or 240v/50hz, 19v operation to cater for all netbook brands.

The **LapRoller™** utilises the laptop's own power pack and connecting lead for charging.

Wifi

Allocated space for housing a wireless router (router not supplied) with an external CAT socket for easy connection to a network point (Wifi mounting plate is an optional extra).

Green Credentials

The all-new energy saving 'Auto-Power-Off' feature automatically switches the unit off after a 50 hour charging cycle, allowing the unit to be left to charge over the weekend without wasting energy.

Future Proof

Features a 5 year guarantee (1 year on electrics & foam inserts). Fully tested and independently certified to BS EN 60335-1: 2002 and A2: 2006, ensuring the highest levels of electrical/build safety, meeting the latest HSE recommendations.

Security

Locks with 2 padlocks and can be tethered to a fixed point through the security anchor providing a significant theft deterrent.

Construction

Robust high impact ABS plastic construction supports the unique design and features fan controlled ventilation and shock absorbing, colour coded foam compartments to protect your equipment during transport.

Dimensions overall: 872L x 660D x 449mmH (The height tapers down to 361mmH), weight 24kg.

Built-in connecting leads for excellent cable management (NetRoller models only).

External CAT socket for connection to a network point.

Fan controlled ventilation.

Supports Wifi with an optional mounting plate and built-in power data connection.

Handles at both ends provide a safe two person lift option.
