

PLASCART™

LIGHTWEIGHT LAPTOP CHARGING CARTS

PLASCART promotes a lightweight, high impact plastic construction, which offers excellent mobility and robustness to meet with the demands of the modern educational or business environment.

These colourful charging carts bring laptops to where ever learning is taking place, providing a **cost-effective** solution to share technology between classrooms.

- Unique features
- Lightweight & Portable
- Low cost & low carbon footprint
- 16, 20 & 30 bay models available

NON-CONDUCTIVE, anti-static construction is **ULTRA SAFE** for use in schools. Plus its **BUILT-IN POWER MANAGEMENT** system with programmable timer **PROTECTS** building circuits and **PREVENTS ENERGY WASTAGE**, helping to **REDUCE SCHOOLS' CARBON FOOTPRINT**.

PlasCart™

PlasCart promotes a non-conductive, anti-static plastic construction and is ultra-safe for use in schools. PlasCarts built-in power management system with a 24 hour programmable timer protects your building circuits and prevents energy wastage, helping to reduce your carbon footprint & electricity bills.

Choice of Colours

Energy Saving Timer

The built-in **Power Management System** not only protects your devices and prevents your building's circuits from being tripped, but it also features an **energy-saving timer**. The timer can be set to charge your devices during the evening or weekend to take advantage of off-peak energy supply hours, helping to reduce your electricity bills.

Easy to use, easy to move

PlasCart is ultra portable for moving from classroom to classroom weighing only 40kgs for the 20 bay model, which is up to 50% less than alternative carts on the market. The **PlasCart** range also utilises the devices' own power packs and connecting leads for charging so can be used with multiple brands at once.

Low maintenance

All the electronics are housed in an easily removable timer module which in the event of a problem can be simply swapped out, greatly reducing down time and costs.

Electrical Safety/Certification

As with all Nuwco charging solutions, **PlasCart** has been fully tested and CE certified, ensuring the highest levels of electrical/build safety and complying with the latest HSE manufacturing guidelines on electrical safety.

- Unique recyclable plastic construction
- Lightweight & compact design for exceptional mobility
- Charges all laptops from a single mains socket
- Power management module to protect building circuits
- Energy saving programmable timer allows for continuous or timed charging
