Includes SMART Notebook™ Collaborative Learning Software and 1 year SMART Notebook Advantage subscription

Key features

Ultra HD 4K imagery

Stunning detailed visuals bring lessons to life and drive learner engagement through an immersive learning experience. The superior image quality is four times the resolution of Full HD ensuring a future proofed investment - today.

Object Awareness

For a simple and intuitive user experience. Pen, finger and erasing recognition is automatically detected when touching the SMART Board 6065 Panel screen. There's no need to select these options from a menu, thus allowing for an improved seamless and efficient user experience.

Pen ID

The first dedicated Educational interactive flat panel featuring Pen ID allowing for 2 users to collaborate seamlessly or work independently. Each user has independent control over the colour of pen they are using which opens up new ways of interacting. This feature is available exclusively with the SMART Board 6065 interactive flat panel which uses SMART™ proprietary DVIT™ (Digital Vision Touch) camera based technology.

Enhanced Multi-Touch Functionality

This enhanced multi-touch functionality, combined with 4 touches when connected to a PC offers unrivalled interactivity with both a PC and MAC.
