

SMART Response™ PE

“With SMART Response, teachers have a new and interesting learning tool to help develop tests, surveys, games, lessons and presentations.”

Frank Moeller, Teacher,
Bowcroft Elementary School,
Calgary, Alberta, Canada

Gain accurate and immediate insight into student learning with the SMART Response PE interactive response system, designed for K–12 classrooms. The system combines wireless remotes (or clickers), a receiver and powerful assessment software, so you can create planned or spontaneous quizzes and instantly tally responses. And with SMART Notebook™ collaborative learning software, you can add interactive and multimedia content to your assessments, making them more engaging.

Create assessments with ease

It's easy to prepare quizzes, tests and exams or spontaneously add questions to lessons. Using SMART Response PE with SMART Notebook software, you can create test material that can be easily integrated into any lesson or assessment activity. You can also choose from hundreds of ready-made SMART Response question sets on the SMART Exchange™ online community.

Deliver questions efficiently

When you deliver a test to your class, students can use their remotes to instantly respond to each question. It's an ideal way to assess knowledge, since even the shyest student can feel comfortable answering questions. And there will always be enough remotes because the system is available in convenient 24- or 32-unit packages.

Manage data effortlessly

Teacher Tools is a management feature that allows you to create class lists, conduct assessments, track student test results and view performance reports – all from one location. Assessment results are automatically added to the built-in gradebook and saved in a single file, which helps you conveniently organize data.

Evaluate results quickly

Now you can create assessment reports as simple or as detailed as you need – from personalized reports on individual students to high-level comparisons of class performance. Plus, test summaries are displayed in easy-to-read pie charts and bar graphs, allowing you to quickly evaluate performance and test results.

- A** Insert quizzes into SMART Notebook lessons
- B** Manage data with the Teacher Tools feature
- C** Access the built-in gradebook

- 1** Power button
- 2** Descriptive icons indicating battery power and network status
- 3** Student question button
- 4** Question scroll buttons
- 5** Yes or no, true or false answer buttons
- 6** Numeric, text and multiple choice response buttons
- 7** Control buttons for fractions, decimals, and positive and negative numbers

Key features

Integration with SMART Notebook

Deliver dynamic assessments that feature images and other multimedia content.

Teacher Tools

Create class lists and set up, conduct and manage tests and quizzes – all from one location.

Comprehensive gradebook

Track performance with reports that are automatically collected and saved to one file.

Content pages

Insert content pages between questions to enhance any quiz, test or exam.

Multiple assessment options

Compile tests for formative and summative assessments, prepare quizzes or exams in advance and ask spontaneous questions.

Question variety

Design questions using six question types – true or false, yes or no, multiple choice, multiple answer, numeric and text response.

Import and export content

Access ready-made question sets on the SMART Exchange. SMART Response PE is also compatible with Microsoft® applications and commonly used file formats.

Flexible marking

Create assessments that assign different values to questions, and adjust student scores in the gradebook.

Tagging

Tag student names and assessment questions with keywords.

Hardware features

SMART Response PE includes a receiver, remotes and software. The system is available in 24- or 32-unit packages, and is compatible with both Microsoft Windows® and Mac operating systems.

Radio frequency technology

The system provides a reliable wireless connection with a range of up to 100 feet (30 m).

Large LCD screen

The screen displays three lines of text, battery power and network connection information.

Ergonomic design

The handheld remote is specifically designed to be comfortable for students.

Extended battery life

Each remote uses two AA batteries.

Easy connection and installation

The receiver uses a USB connection and can support 60 remotes.

Receiver maintenance

LED lights indicate power status and whether information has been sent or received.

Specifications

Receiver size

4 3/4" W x 7/8" H x 2 1/4" D
(12.1 cm x 2.2 cm x 5.7 cm)

Receiver weight

5 3/4 oz. (156 g)

Remote size

2 1/4" W x 5 5/8" H x 1 1/8" D
(5.7 cm x 14.3 cm x 2.9 cm)

Remote weight

7 1/4 oz. (100 g) without batteries
